POUPART^{EST} 1895 IMPORTS NOTICE BOARD

- ◆ **Israeli Grapefruit**
Last week saw the start of both Marsh and Sunrise Grapefruit. At the moment we are restricted on sizes but the situation will improve in the near future. Due to high temperatures the eating quality is better than expected on the first arrivals.
- ◆ **Turkish Lemons**
First arrival of “Noble” Lemons have been very well accepted. Quality has been excellent, and we will have regular arrivals offering a full range of sizes.
- ◆ **Spanish Citrus**
We will be offering the full range of Citrus very shortly. In general it should be a normal crop which will mean sizes will peak in the mid ranges. Early indications is that it should be a good quality season. Our first Satsumas have just arrived, followed by Clementines in a few days time. Oranges and Lemons will arrive by the beginning of November.
- ◆ **Brazilian Grape**
Our first Thompson is expected in about ten day. The crop is slightly down, but berry size and sugars are good. We will have Crimson available in the next fortnight.
- ◆ **Israeli Sharon**
The season should be underway in the next three weeks. Supplies will be limited until we get into November. The crop this year appears to be normal and we expect sizes to run more between medium and small.
- ◆ **Israeli Avocados**
Unfortunately we never received the Tig variety last month as the high temperatures affected the keeping quality, and most of the crop remained on the home market. We will however have the first Ettinger arriving in a fortnight. We will offer, as always, a full range of sizes.
- ◆ **Palestinian Dates**
We now have regular arrivals of new season Medjoul Dates for the forthcoming months. We have available both 5kilo and 8x1kilo packs and can deliver small quantities if required.
